

HAWAII HEART FOUNDATION

CARDIAC ARREST STATISTICS

You can save a life!

The likelihood of survival increases to **90%** when the victim receives high quality CPR and a shock from an AED within the first 2 minutes of sudden cardiac arrest.

14,200

children 18 years old and under, will suffer a sudden cardiac arrest from all causes (trauma, cardiovascular causes and sudden infant death syndrome) each year.

75% of the sudden cardiac arrests that occur yearly will happen at **home**

Performing CPR **triples** a person's chance of survival.

The life you save will most likely be someone you love!

Every Minute

Someone will go into sudden cardiac arrest

The sudden cardiac arrest survival rate in Hawaii is about

10%
